Note: Cast acrylics have thickness variations that may present difficulties in applications where thickness tolerance is important (i.e. fitting into extrusions, thermoforming applications where walls must maintain uniform thickness, and assembly of complex structures). Remember to check gauge when non-contact engraving takes place, and to periodically re-check focal lengths when laser engraving. In some cases, thickness variations may require the operator to make multiple passes during laser engraving.

# ColorHues® Glitter

ColorHues® Glitter acrylic sheets feature glitter embedded directly into the tinted plastic, creating a dazzling, eye-catching effect. The high-quality gloss finish on both sides of the sheet gives a glass-like appearance with the durability of acrylic, making it ideal for use in point-of-purchase displays or signage in high traffic areas. These single-ply sheets can be laser-cut into shapes and letters or used as a signage component for an endless range of applications.
